

Top Weather Apps Used by Wedding Planners

The Weather Channel offers accurate, highly rated hourly forecasts and live radar up to 2 weeks in advance.

AccuWeather provides "MinuteCast" to pinpoint precipitation minute-by-minute, helping to decide when to move the ceremony indoors.

Weather Underground uses a network of personal weather stations for highly localized, hourly, and daily reports.

1 Degree Outside is hyper-local and provides detailed, specific, and accurate, hour-by-hour and long-range (14-day) forecasting.

Windy provides detailed wind and weather layers, great for outdoor ceremonies and tented events.
